### EXPERIENCE

#### Hotels.ng | Software Developer

Remote

Nov. 2023 – Present

- Developed a chrome extension for bug reporting for software testers and project managers that capture and saves user's screen recordings to a database.
- Created a web app for users to view recordings, create products, and associate Recordings with product versions.
- Implemented integration with project management tools such as Slack, Jira, and Trello for seamless task sharing and collaboration.
- Developing an applicant tracking system using Next.js, enabling companies to Create and manage job postings within the platform.
- Integrating APIs such as Assembly AI for realtime speech-to-text and Google API for text-to-speech to enhance functionality, including an AI interviewer feature.

#### Monvid (e-Commerce Start-Up) | Software Developer

Remote

Sept. 2021 – Oct. 2023

- Developed an e-commerce website for hotel delivery using React.js, Express.js.
- Created a fully functional admin dashboard to for managing products and orders.
- Implemented a feature where quotations are automatically generated and Sent to users whenever they place an order on the website
- Implemented context API for state management that made collaboration Seamless.

#### EnoverLab | Software Developer Intern

Remote

Feb. 2021 – August 2021

- Developed a user-friendly and responsive website to assist pregnant women and nursing mothers in accessing vital information and resources.
  - Utilized React.js to integrate Google Maps API, enabling users to easily locate the nearest gynecologists and healthcare facilities in their vicinity.
  - Collaborated closely with the design team to create a visually appealing and intuitive website layout that resonated with the target audience.
- 

### PROJECTS

#### • React-Utils

Building an open-source utility library with 60+ reusable functions for React and JavaScript projects. Developed with TypeScript to ensure type safety and compatibility across both JavaScript and TypeScript environments.

<https://github.com/Olamide-Bello/react-utils>

#### • BumpCare

Developed a website for pregnant women and nursing mothers to get quality information and resources. With the help of google maps API, I added a map feature to help users to locate the nearest clinics. Also built a due date calculator to help pregnant women track their due delivery date.
